Multimedia is revolutionizing the art world by combining sound, graphics, video, text, and animation to create interactive stories, games, and educational materials. Electronic storage allows for online access to symphonies, films, and museums. This interactive nature requires user participation, making it a powerful tool for education and communication. Multimedia challenges the idea of art having just one creator and allows for more freedom in the relationship between the artist and viewer. However, the flexibility of multimedia makes it difficult to trust the authenticity of content, as it can be easily altered. Additionally, content theft remains a concern.

Emotions are universal but deeply influenced by culture and historical context. Early research focused on western Europe and the United States, where anger was less common during the seventeenth and eighteenth centuries. Romantic love became more important, affecting marriage arrangements. Men were encouraged to express appropriate anger, but not fear. In the twentieth century, feeling angry, guilty, anxious, fearful, or jealous was seen as harmful in U.S. society, although it was acceptable to express some emotions through movies or sporting events. Emotion expression varies across cultures, with some societies, especially around the Mediterranean, valuing respect and emotions like anger and jealousy. Chinese people value negative emotions more than other societies, but were less likely to claim love in the 1970s. In the modern world, there are always variations in emotions and new ones, such as the U.S. commitment to self-confidence in children.

54. According to early research, which emotions were less common in western Europe and the United States during the seventeenth and eighteenth centuries?

- A) Fear and anxiety
- B) Anger**
- C) Love and jealousy
- D) Guilt and sadness
- E) Happiness and excitement

55. In the twentieth century U.S. society, how were emotions like anger, guilt, anxiety, fear, or jealousy viewed?

- A) As signs of strength
- B) As unimportant
- C) As harmful**
- D) As acceptable in all situations
- E) As positive emotions

56. How did Chinese people view love in the 1970s compared to other societies?

- A) They valued love more.
- B) They expressed love more openly.
- C) They did not value love at all.
- D) They saw love as the most important emotion.
- E) They were less likely to claim love.**

57. How are emotions influenced according to the text?

- A) Only by personal experiences
- B) By culture and historical context**
- C) Only by biological factors
- D) By climate and geography
- E) Only by education and upbringing

In November 1872, a ship named the Mary Celeste was found empty in the Atlantic Ocean, and no one knows why. It had sailed from New York to Italy with Captain Benjamin Briggs, his family, and seven crew members. They were last seen near Santa Maria island on November 25. Nine days later, another ship found the Mary Celeste abandoned, with no one on board. Some thought sea monsters attacked it, others thought the crew left because they feared the ship was sinking. Nobody ever saw the crew again. The ship changed owners many times but was eventually deliberately destroyed in 1885 for insurance money. In 2001, parts of the ship were found, but the mystery of what happened to its crew remains unsolved.

61-64. Soruları aşağıdaki parçaya göre cevaplayınız.

The trend of being environmentally conscious has led to a shift towards eating more fruits and vegetables, as raising animals for food consumes a significant amount of land and resources, resulting in greenhouse gas emissions. However, some plants may actually be harmful to the environment. Soy products, such as soy milk, tofu, and tempeh, have become popular as a meat replacement. However, soy requires a large amount of land for growth, reducing the available land for other crops and destroying delicate environments like rain forests. Rain forests help clean harmful gases out of the air, and plants and animals found in rain forests will disappear if they are destroyed. Almond milk and avocados are also trendy foods that require a significant amount of water. Almond milk requires a gallon of water to grow a single almond, while avocados require 72 gallons of water to grow a pound. These crops can have a significant impact on areas experiencing drought. To protect the environment, it is essential to ensure that efforts to protect it do not damage it. As the Earth is our home, it is crucial to ensure that our efforts to protect it do not harm it.

61. Why does the text suggest being cautious about efforts to protect the environment?
A) To avoid political controversy.
B) To ensure that protective measures do not cause harm.
C) To appease international organizations.
D) To prevent damage to ecosystems.
E) To save money on food production.
62. Which statement about almond milk and avocados is supported by the text?
A) They are the most environmentally friendly alternatives to meat.
B) They are low in calories.
C) They require minimal resources to produce.
D) They are disliked by environmentalists.
E) They require significant amounts of water to produce.
63. What is one reason for the shift towards consuming more fruits and vegetables?
A) They require less land and resources than raising animals.
B) They are cheaper than meat.
C) They require less water to grow.
D) They reduce greenhouse gas emissions.
E) They taste better than meat.
64. What is the overall message of the text regarding environmental protection?
A) Consuming more meat is beneficial for the environment.
B) Only fruits and vegetables harm the environment.
C) Efforts to protect the environment should be abandoned.
D) Protecting the environment should be done thoughtfully to avoid unintended consequences.
E) Environmental protection efforts are unnecessary.
